

X-STAND PLUS

Technical Specifications | R1.06052015

DESCRIPTION

The X-Stand Plus is a user-friendly banner stand that can be displayed in high-traffic areas. It is an attractive banner stand that is ideal for indoor settings. The display is constructed of aluminum and fiberglass poles that come together at a center connector, which allows the poles to be adjusted and helps form the display's distinctive X shape. Once the frame has been put together, mount the 3'x7' custom print onto the poles and your X-Stand is ready to go! The X-Stand's quick assembly allows the print to be changed in seconds by anyone. It is a great choice at venues where employees will be changing the print as promotions change. The X-Stand Plus is lightweight and collapses into its carrying case for effortless transportation. It could be used to promote a new product at a business conference or to advertise a department store's current sale.

PRODUCT SPECIFICATIONS
